

762
A publication of
INSTRUMENT SOCIETY of AMERICA

ISA TRANSACTIONS

EDITORIAL BOARD

EDITOR-IN-CHIEF

Prof. Gerald E. Dreifke
Saint Louis University

MANAGING EDITOR

Glenn F. Harvey
Instrument Society of America

EDITOR — MEASUREMENT APPARATUS AND APPLICATIONS

Prof. James M. Mozley
State University of New York

EDITOR — DATA HANDLING & COMPUTATION, AUTOMATIC CONTROL SYSTEMS

Prof. Thomas J. Higgins
University of Wisconsin

EDITOR — SURVEYS & REVIEWS

Theodor A. Dukes, Research Engineer
Princeton University

Volume 7 1968

Distributed by

PLENUM PRESS

227 West 17th Street, New York, N. Y. 10011

All ISA TRANSACTIONS material has been selected on the basis of significant contribution to the technology. In every instance papers have been referred to the respective authors to reflect additional progress which may have occurred subsequent to original preparation.

Library of Congress Catalog Card Number 62-13600

ISA TRANSACTIONS is printed and distributed quarterly by
Plenum Press, 227 West 17th Street, New York, N. Y. 10011

**ANNUAL SUBSCRIPTION
(4 ISSUES)**

\$28.00 domestic

\$33.00 foreign

ISA members: \$15.00

Printed in the United States of America

CONTENTS

Volume 7

1968

Number 1

| | | | |
|--|----|--|----|
| Capabilities of Modern Unsaturated Cells | 1 | Analysis of a Laser Doppler Velocimeter | 43 |
| by Alton R. Karoli | | by Donald T. Davis | |
| <i>The Eppley Laboratory, Inc., Newport, Rhode Island</i> | | <i>Lawrence Radiation Laboratory, University of California, Livermore, California</i> | |
| Dynamic Memory Protection in Interactive Environment Programming | 6 | A Two-Dimensional Study of Miniaturized Calorimetric Techniques for Extreme Stagnation Heating Rates (3000–10,000 Btu/ft²-sec) | 52 |
| by John H. Doede and Louis Blanc | | by Donald C. Howey | |
| <i>Data International, Inc., Minneapolis, Minnesota;</i> | | <i>AVCO Corporation, Wilmington, Massachusetts</i> | |
| <i>Electro-Mechanical Research, Inc., Minneapolis, Minnesota</i> | | | |
| Rapid and Frequent Measurement of Human Systolic and Diastolic Blood Pressures | 11 | How to Calibrate Pressure Transducers at 7°K | 59 |
| by Michael T. Lategola and Hiley F. Harrison | | by William H. McLellan | |
| <i>Federal Aviation Administration, Oklahoma City, Oklahoma</i> | | <i>Whittaker Corporation, Pasadena, California</i> | |
| Versatility of Mercury Strain Gauge Plethysmography in Evaluating Peripheral Vascular Disease | 19 | Measurement of Ultrafine Surface Finishes | 67 |
| by Santiago A. Sanchez | | by J. C. Moody | |
| <i>Scott and White Clinic, Temple, Texas</i> | | <i>Sandia Corporation, Albuquerque, New Mexico</i> | |
| Mass Spectroscopy and Gas Chromatography Correlated for Leak Rate Measurement | 25 | Best Discrete System Simulation of a Linear Continuous System | 72 |
| by George Robert Talbott | | by James A. Cadzow | |
| <i>North American Rockwell Corporation, Anaheim, California</i> | | <i>State University of New York, Buffalo, New York</i> | |
| Use and Applications of a Nonradioactive Helium Ionization Detector in Process Gas Chromatography | 38 | Two Approaches to Turbine Start-Up Automation | 79 |
| by R. Villalobos | | by J. G. Selmeczy, A. Frey; and R. J. Harsevoort | |
| <i>Beckman Instruments, Incorporated, Fullerton, California</i> | | <i>Westinghouse Electric Corporation, Pittsburgh, Pennsylvania;</i> | |
| | | <i>Wisconsin Electric Power Company, Milwaukee, Wisconsin</i> | |
| | | About the Authors | 85 |

Number 2

| | | | |
|---|-----|---|-----|
| Liquid-in-Glass Thermometers: Principles and Practices | 87 | Indirect Probing of Cloud and Precipitation by Microwave Radiometer | 138 |
| by Robert D. Thompson | | by Roger M. Lhermitte | |
| <i>Taylor Instrument Companies, Rochester, New York</i> | | <i>U.S. Weather Bureau, Norman, Oklahoma</i> | |
| Care and Use of Liquid-in-Glass Laboratory Thermometers | 93 | An Analytical Approach to Miniaturization of Arc-Second Encoders | 143 |
| by Sidney Ween | | by Charles E. Lenz | |
| <i>Every Ready Thermometer Company, New York, New York</i> | | <i>University of Hawaii, Honolulu, Hawaii</i> | |
| Platinum-Resistance Thermometry Using an AC Inductive Ratio Bridge | 101 | Graphical Method for Determining Stability of Linear Control Systems with Time Delay | 156 |
| by Joseph J. Hill | | by K. W. Ho and W. K. Chan | |
| <i>National Physical Laboratory, Teddington, England</i> | | <i>San Jose State College, San Jose, California;</i> | |
| A Universal Voltage-Controlled Oscillator for Physiological Applications | 108 | <i>University of Hong Kong</i> | |
| by R. Rader, J. P. Meehan, K. Griswold, J. Henriksen, and L. Casados | | Transient Response Analysis of a Class of Continuous Nonlinear Time-Varying Automatic Control Systems by Functional Techniques and Multidimensional Laplace Transforms | 166 |
| <i>University of Southern California, Los Angeles, California</i> | | by Richard V. Ridings and Thomas J. Higgins | |
| Modern Clinical Temperature Measurement | 112 | <i>Texas Instruments, Inc., Dallas, Texas;</i> | |
| by Thomas L. Robertson | | <i>The University of Wisconsin, Madison, Wisconsin</i> | |
| <i>Consolidated Electrodynamics Corporation, Monrovia, California</i> | | | |
| On the Nature of Fluid Amplifiers and the Oral Cavity | 130 | About the Authors | 173 |
| by M. L. Petrovick | | | |
| <i>Northwestern University, Institute for Language Disorders, Evanston, Illinois</i> | | | |

Number 3

| | |
|--|-----|
| Design and Calibration of Thin-Foil Heat Flux Sensors | 175 |
| by Erle W. Malone <i>The Boeing Company, Seattle, Washington</i> | |
| Use of Thin-Skinned Calorimeters for High Heat Flux Arc-Jet Measurements | 181 |
| by Keith E. Starner <i>Aerospace Corporation, El Segundo, California</i> | |
| Entry Vehicle Instrumentation for Heat Shield Ablation Measurements | 187 |
| by Peter J. LeBel and James M. Russell <i>NASA-Langley Research Center, Hampton, Virginia</i> | |
| The Absolute Calibration of Thermal Radiation Detectors | 194 |
| by A. J. Drummond <i>The Eppley Laboratory, Inc., Newport, Rhode Island</i> | |
| Distortions of Controlled Transients by Shock-Monitoring Systems | 207 |
| by R. O. Brooks and J. A. Guzman <i>Sandia Corporation, Albuquerque, New Mexico</i> | |
| Shock-Pressure Instrumentation for Severe-Environment Applications | 217 |
| by William A. Holmgren and Peter K. Church <i>Kaman Nuclear, Division of Kaman Sciences Corporation, Colorado Springs, Colorado</i> | |
| An Etched Manganin Gauge System for Shock-Pressure Measurement in a High-Noise Environment | 223 |
| by Edward O. Williams <i>Sandia Corporation, Livermore, California</i> | |
| A Proposed Method for the Measurement of Vibration Transducer Transverse Sensitivity Ratio | 231 |
| by John D. Ramboz <i>Metrology Engineering Center, Naval Plant Representative, Pomona, California</i> | |
| Resistance Changes in Transversely Strained Conducting Filaments | 237 |
| by I. G. Scott <i>Australian Defence Scientific Service, Aeronautical Research Laboratories, Melbourne, Australia</i> | |
| Stress and Strain Gauges for Use in Soil Dynamics Research | 242 |
| by Delon Hampton and William B. Truesdale <i>Howard University, Washington, D.C.; IIT Research Institute, Chicago, Illinois</i> | |
| Under-Sodium Scanner Systems | 252 |
| by Clyde C. Scott <i>Atomic Power Development Associates, Inc., Detroit, Michigan</i> | |
| About the Authors | 265 |

Number 4

| | |
|--|-----|
| Application of a High-Sensitivity Total-Organic-Carbon Analyzer | 267 |
| by R. H. Jones and A. F. Dogeforde <i>Beckman Instruments, Inc., Fullerton, California</i> | |
| Process Gas-Chromatographic Analysis of Liquids Containing High-Boiling Residues or Dissolved Solids | 273 |
| by J. Smith and R. Villalobos <i>American Oil Company, Whiting, Indiana; Beckman Instruments, Inc., Fullerton, California</i> | |
| Improved Carbonaceous Analyzer | 279 |
| by A. M. Bartz <i>Dow Chemical Company, Midland, Michigan</i> | |
| Chemically Bonded Liquid-Phase Packings for Gas Chromatography | 283 |
| by C. J. Bossart <i>Mine Safety Appliances Company, Pittsburgh, Pennsylvania</i> | |
| An Automatic Industrial Process Titrator Employing Analog Computation | 289 |
| by F. H. Zimmerli <i>Rohm and Haas Company, Philadelphia, Pennsylvania</i> | |
| Continuous, Process Parts-Per-Million pH Measurements | 299 |
| by R. W. Sims and V. R. Rogstad <i>Monsanto Company, Texas City, Texas</i> | |
| Oxidation-Reduction Potential: Theory and Application to Plating-Waste Controls | 304 |
| by F. C. Snowden and B. J. Galetti <i>Leeds & Northrup Company, Philadelphia, Pennsylvania</i> | |
| Instrumentation and Automation at the Joint FWPCA-DC Pilot Plant | 310 |
| by D. F. Bishop and R. L. Evans <i>Federal Water Pollution Control Administration, Washington, D.C.; Robertshaw Controls Company, Anaheim, California</i> | |
| Instrumentation for New Jersey's Vehicle Emission Testing | 317 |
| by A. J. Andreatch and C. E. Fegraus; J. N. Pattison; and J. C. Elston <i>Scott Research Laboratories, Inc., Perkasie, Pennsylvania; University of Cincinnati, Cincinnati, Ohio; New Jersey State Department of Health, Trenton, New Jersey</i> | |
| Calibration of SO₂-Monitoring Instruments | 327 |
| by T. A. Gray and E. R. Kuczynski <i>Leeds & Northrup Company, North Wales, Pennsylvania</i> | |
| Advancements in Magnetic Flowmetering | 332 |
| by Paul F. Ellis <i>Fischer & Porter Company, Warminster, Pennsylvania</i> | |
| Reactor Sampling for Continuous Polymer Viscosity Analysis | 338 |
| by R. K. Reid and F. H. McGinnis <i>Phillips Petroleum Company, Bartlesville, Oklahoma; Seismograph Service Corporation, Tulsa, Oklahoma</i> | |
| Interaction of Optical-Maser Beams with Ionized Gases | 344 |
| by Arwin A. Dougal and Otto M. Friedrich, Jr. <i>The University of Texas at Austin, Austin, Texas</i> | |
| A Vaporizing Valve for Liquified Gases | 352 |
| by J. Kertzman <i>E. I. du Pont de Nemours & Company, Wilmington, Delaware</i> | |
| Calibration of Humidity-Measuring Instruments at the National Bureau of Standards | 356 |
| by Arnold Wexler <i>National Bureau of Standards, Washington, D.C.</i> | |
| Determination of Low Moisture Concentration in Refinery Gases | 363 |
| by F. A. Leisey <i>American Oil Company, Whiting, Indiana</i> | |
| Measurement of Water Vapor in Catalytic Reformer Gases | 367 |
| by Robert E. Beck <i>Atlantic Richfield Company, Philadelphia, Pennsylvania</i> | |
| A New Humidity Generator | 373 |
| by J. Kertzman <i>E. I. du Pont de Nemours & Company, Wilmington, Delaware</i> | |
| About the Authors | 377 |
| Author Index | 380 |
| General Subject Index | 381 |
